Arsenate of Lead.

The Great Summer Spray. Arsenate of lead is the great spray for codling moth, the canker worm, caterpillars, grape insects, rose bugs, etc. It is the specific remedy against all leaf-eating insects. Arsenate of lead is a most concentrated form of arsenical poison, put up in the shape of a heavy, dense, white paste, which mixes well with water, although it is not soluble. Its complete insolubility makes it perfectly safe to apply at any strength without burning the foliage. In this and its great adhesive qualities lies its superiority to Paris Green and other insecticides. It is mixed with water at the rate of two or more pounds to 50 gallons, and applied as a spray. Full directions on each package.

"Clipper" Grain and Seed Cleaner

We have recently added a large power cleaner and are now prepared to clean all kinds of seed grain, clover seeds, grass seeds, vetch seed, etc.

We can clean far better than with a hand cleaner as the fan runs more even and we can better regulate the wind blast.

Our machine is equipped with air controller, traveling brushes, and a full assortment of screens and does fine work.

Do not sow foul seeds but reclean your grain and all seeds and have your land produce a good crop instead of a lot of foul weeds. Our charges are reasonable and we guarantee our work.

We are also local agents for this well-known cleaner and will be glad to show you what they will do at any time.

The prices of the smaller sizes are as follows: **No. 1 \$28;**
No. 2 \$37.50.
